

Selecting the Columns that you want to View on your Dashboard

Selecting the Columns that you want to View on your Dashboard

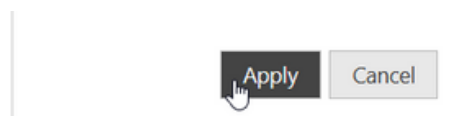

To choose which columns are displayed, click any column header and select "Column Chooser."

With Column Chooser open, simply click "Hide" next to any columns you wish to hide, and "Show" next to any columns you want displayed. In this example, we will display the ID column and hide the CO column.

Scroll down to the bottom of the Column Chooser window, and click on the Apply button.

The window will close, and you will be left with the columns you wish to have displayed.
